

FlexoTub

IDF high speed printing machine for decoration of rectangular products

FlexoTub

“The High Speed Rectangular IDF printer”

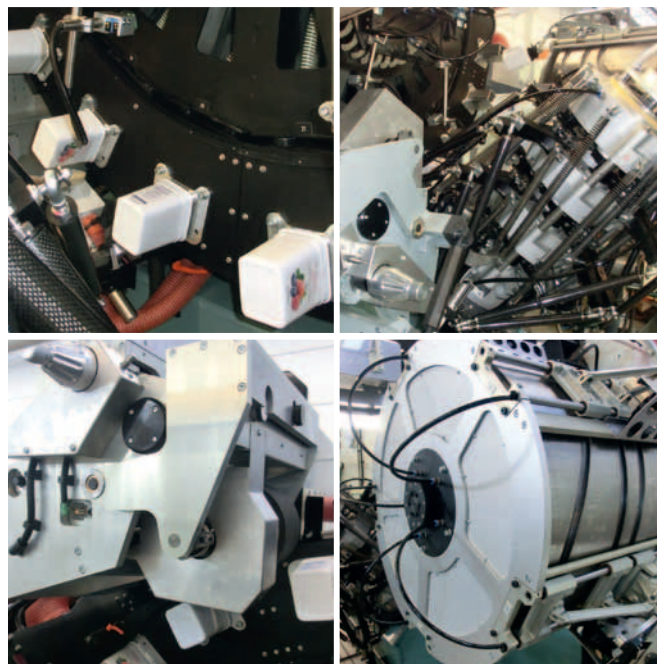

To make rectangular tubs an economic packaging solution, Van Dam developed The FlexoTub printing machine. The FlexoTub is a high speed rectangular product printing machine, which is equipped with IDF printing technology, this combination reduces decoration costs dramatically and makes rectangular packaging affordable.

The IDF technology allows having high quality printing with quick design change-over as the colors do not have to be changed.

For colored or transparent tubs, spot background white is integrated in the machine. The rectangular products can be spot varnished too.

- Rectangular printer with IDF technology
- Lowest decoration costs on rectangular products
- Production speed up to 400 ppm
- Suitable for wide range of products
- Spot background color for printing of colored or transparent tubs
- Spot varnish for ultimate gloss
- 8 IDF color heads for 7 process colors and 1 spot color
- High speed for large products

Standard specifications

Min./max. product height

- 20 - 125 mm

Min./max. product length

- 60 - 160 mm

Min. / max product width

- 60 - 135 mm

Min. / max. taper

- 2 - 10°

Max. print length

- max panel length can be printed
