

# AMC SuperNova HeavyDuty

# AMC SuperNova HeavyDuty

The AMC SuperNova HeavyDuty is designed for very viscous masses and fillings. It was built with special attention to the durability and capacity so you don't even have to worry about your heaviest masses.

This is the ideal machine if you are dealing with products of high viscosity. Stronger gear, specially designed scrapers, fixed elements are only some of the key components to ensure that this is a machine built to last even with the toughest masses. Specially engineered to fulfill your needs and requirements.

High viscosity masses require the utmost attention to the toughness and strength of the tempering machine, especially its mechanical parts in contact with the mass.

We can analyze your mass in our Technology Center and design the perfect HeavyDuty machine.

The HeavyDuty kit is available in our AMC SuperNova models - Basic, PreTreat and CTS.

## UPS/EFU

- Handles heavy masses and fillings
- Constant crystal content
- Specially engineered for your mass
- 
- Automatic control system available
- Mechanical parts are chosen to meet the challenges of handling heavy mass

## We have a broad portfolio of machinery and equipment

Beneath are listed products in the same category.

- AMC SuperNova CTS
- AMC SuperNova PreTreat
- AMC SuperNova CTS Aeration
- AMC SuperNova Basic
- AMC SuperNova HeavyDuty CTS
- AMC SuperNova HeavyDuty PreTreat
