

FM 8.50 TURKEY DEBONER

foodmate

Poultry Processing Systems

The Foodmate 8.50 Turkey Thigh/Drum/Prime Wing Deboner debones up to 40 turkey pieces per minute. The machine is constructed of stainless steel with a stainless steel curve drum. It can be adjusted easily for various bird sizes designed to debone with the control panel located next to the enter area. The machine can be loaded by one operator and has an automatic unloading device for the deboned meat and bones.

The deboner works according to the "diaphragm principle". This principle is put into operation as the product is inserted on the diaphragm and the bone is pressed out of the meat by a pen. The meat is then held up at the bottom, while the bone is pressed through an opening in the center of the diaphragm, stripping the meat from the bone. Lastly, the bone is cut by the optional saw and meat disposed of by the unloader.

Knuckle saw

Our mission is to innovate, automate and bring cost-effective solutions to the industry.

FM 8.50 TURKEY DEBONER

Key Benefits:

- Allows for a maximum of 40 pieces per minute
- Achieves high yields by selecting the right size diaphragms
- Open design allows for easy access for cleaning and maintenance.
- Heavy duty construction to handle up to 22 kg turkeys
- Compact design and footprint
- Minimum moving parts = low cost of ownership

Technical Specifications:

- Stainless steel frame and motor
- Motor (IP66) power is 1,1 kW
- Knuckle saw motor: 0,75 kW
- Machine dimensions:
 - Length: 1900 mm
 - Width: 2200 mm
 - Height: 2580 mm
 - Weight: approx. 1750 Kg

Foodmate is an equipment manufacturing company based in the Netherlands. Founded in 2006, we focus primarily on poultry processing, and we recently launched Foodmate US, expanding our worldwide distribution into North America. Driven by research, paired with unmatched knowledge and decades of experience, it's our mission to innovate, automate and bring cost-effective solutions to the industry.

Our product line spans a wide assortment of processing equipment designed for live bird handling, killing and de-feathering, eviscerating, chilling, weighing, cut-up systems, deboning, and more. In addition to manufacturing, we provide an extensive variety of spare parts and service for other processing equipment and reconditioned machines.

Our team represents decades of industry knowledge and experience resulting in the engineering, development and implementation of new designs for our clients and their ever-changing needs.
