FILETMASTER 180

Filleting made easy

- *Can produce both single and butterfly fillets*
- *The intestines and kidney cord are removed with vacuum*
- *Powerful and solid design*

FILETMASTER 180

The FILETMASTER 180 can fillet individual fish into either single fillets or butterfly fillets with a very high capacity. FILETMASTER can be combined with HEADMASTER from KROMA or other head cutting machines.

The machine is built simply so it is easy to set and service the machine. The machine construction is designed from powerful stainless steel to make the machine stable.

1. Intestines and the kidney cord in the fish are removed very effectively with vacuum before filleting. This way many of the bacteria that can cause contamination later in the filleting are removed.

Immediately after cutting the belly open, the intestines are sucked away after which a rotating brush removes the kidney cord.

2. With the FILETMASTER 180 it is possible to produce both butterfly fillets and single fillets.

If butterfly fillets are being produced the knives that divide the fish are removed. For single fillets the knives are mounted and the fish will be divided.

The output from the fillet machine is high as the machine adapts to the individual fish. The setting of the knives is easy and can be done in a few minutes.

3. The transmission on the FILETMASTER 180 consists exclusively of timing belts. That means that the knives will not stop even if more tractive force for the knives is needed for a short while. The timing belts are easy to change and adjust.

The machine is equipped with 2 independent engines. One engine to pull the knives, and one for the drive of belts and fish.

TECHNICAL DATA:

Capacity:

Up to 180 fish per minute

Fish species:

Trout, seabream, seabass

Working range:

Fish between 0.15-0.75 kg

Operators:

1

Supply:

3x400V+N+PE, 16A, 50Hz

Motors:

3x400V, 1.5/0.75kW, 50Hz

Water consumption:

Adjustable

Materials:

Stainless steel AISI 304

Finish:

Bead blasted

Dimensions:

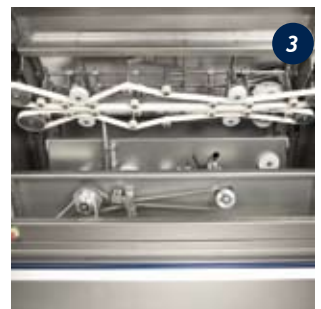

2100x1200x1700 mm (LxWxH)

Weight:

Approx. 700 kg

Accessories:

- Headcutter
- Vacuumsystem
- GRINDMASTER
