

AS 4 Apple peeling & slicing machine

for
peeling, slicing,
wedging and coring
APPLES

The multifunctional apple peeling machine AS 4 (table top model) is perfectly suited for processing a wide size range of apples (55 – 85 mm Ø): Peeling, coring, wedging and / or slicing in one pass ! A spring-loaded knife adjusts automatically to provide a consistent result on uneven surfaces. The peeling thickness can be adjusted. It is simple to operate. Also, the slicing, segmenting and coring tools can be changed easily and very quickly.

Operation

Up to 3 apples can be held at one time. There is an easy three step process:

1. Place the apple on spindle / remove slices
2. Automatic peeling and slicing
3. Cutting the core out of the fruit and, if desired, cutting into pieces with a wedging knife (bite-sized apple pieces e.g. for fruit salad and pie topping).

The core is easily separated through the tube to separate from product yield. Waste peels are separated from yield by the plexiglass shield.

The solid industrial machine is made of stainless steel. It has been conceived caring specially about simple maintenance, easy and efficient cleaning and is, therefore, best suitable for professional applications.

Optionally, an apple peeler without the feature to slice apples - model AS 2 - can be supplied.

Technical specifications:

Capacity:	up to 600 apples / h
Apple size:	55 - 85 mm Ø
Voltage:	230 V, 50 Hz, 1 Ph
Width x length x height:	300 x 660 x 400 mm
Weight:	35 kg

Benefits – at a glance:

Perfect cutting quality – Slicing attachments knives

- 3,5 mm
- 4,5 mm
- 5,5 mm
- 7,5 mm
- 10 mm
- 14 mm
- 20 mm

Dividing attachments – standard corer Ø 20, 23 and 27 mm

Many cutting tools are available:

- 2 wedge-star
- 4 wedge-star
- 6 wedge-star
- 8 wedge-star
- 12 wedge-star
- 16 wedge-star
- 24 wedge-star

Corers Diameter

- 20 mm
- 23 mm
- 27 mm

Funnel for separation of fruit and peeling

Perfect separation

The separation system separates fruit and peeling.

Easy installation

The separation system is placed under the apple peeler.

No screw connection or the like.

Compact stainless steel design

Dishwasher safe.

Effective peeling, coring and cutting!

We develop and manufacture stand alone and special machines as well as complete processing lines. You can optimise your production process with the high quality AS4.
