WING PORTIONER

The Foodmate Wing Portioner cuts wings into two or three parts (drums, flaps, tips) and handles both broilers and roasters. This wing wheel will process left, right, and intermixed wings. Due to the unique design of the wheel and cutting blades, it operates efficiently at 50 - 60 wings per minute. The Wing Portioner is a compact machine that may be installed in a multiple unit system and has an optional three-chute slide that pushes the parts into a divided conveyor. It is composed of stainless steel and food approved nylon.

Key Benefits:

 Allows for a maximum of 60 wings per minute Foodmate is an equipment manufacturing company based in the Netherlands. Founded in 2006, we focus primarily on poultry processing, and we recently launched Foodmate US, expanding our worldwide distribution into North America. Driven by research, paired with unmatched knowledge and decades of experience, it's our mission to innovate, automate and bring cost-effective solutions to the industry.

Our product line spans a wide assortment of processing equipment designed for live bird handling, killing and de-feathering, eviscerating, chilling, weighing, cut-up systems, deboning, and more. In addition to manufacturing, we provide an extensive variety of spare parts and service for other processing equipment and reconditioned machines.

Our team represents decades of industry knowledge and experience resulting in the engineering, development and implementation of new designs for our clients and their ever-changing needs.

Technical Specifications:

- Stainless steel frame and motor
- Motor (IP66) power is 0,75 kW
- Machine dimensions:
- Length: 887 mm
- Width: 725 mm
- Height: 1297 mm
- Weight: approx. 169 kg
