

## LEG PROCESSOR SII

**foodmate**

Poultry Processing Systems

The Foodmate Leg Processor SII is designed to anatomically remove the back from the saddle to create a back out whole leg. The unique design of the Leg Processor SII lets the saddles run straight through the machine and change direction. The back is turned from the legs. The machine can run a wide size range while maintaining an optimal anatomical cut with minimal

to no adjustments. The height of the machine can be mechanically adjusted by a spindle, so the machine can be adjusted to the size of the bird. The Leg Processor SII can be installed in either a new Foodmate Cut-Up System or it can easily be integrated into your existing frame or flex cut-up system.

Our mission is to innovate, automate and bring cost-effective solutions to the industry.

## LEG PROCESSOR SII

### Key Benefits:

- Increases operations flexibility by accommodating a wide size range with minimal adjustments
- Reduces bone content
- Improves oyster retention
- Improves yield
- Increases bird size accommodations through height adjustment by the spindle

Foodmate is an equipment manufacturing company based in the Netherlands. Founded in 2006, we focus primarily on poultry processing, and we recently launched Foodmate US, expanding our worldwide distribution into North America. Driven by research, paired with unmatched knowledge and decades of experience, it's our mission to innovate, automate and bring cost-effective solutions to the industry.

Our product line spans a wide assortment of processing equipment designed for live bird handling, killing and de-feathering, eviscerating, chilling, weighing, cut-up systems, deboning, and more. In addition to manufacturing, we provide an extensive variety of spare parts and service for other processing equipment and reconditioned machines.

Our team represents decades of industry knowledge and experience resulting in the engineering, development and implementation of new designs for our clients and their ever-changing needs.

### Technical Specifications:

- Stainless steel frame and motor
- Motor (IP66) power is 1,5 kW
- Machine dimensions:
  - Length: 1269 mm
  - Width: 1080 mm
  - Height: 1457 mm
  - Weight: approx. 290 Kg
